

Small, independent geotechnical laboratory with expertise in soils mechanics, rock mechanics, materials testing, geosynthetics testing and construction services

GAI-LAP Accredited

Advanced Terra Testing (ATT) offers a variety of geosynthetics testing. From thickness and Mass per Unit Area to tensile and compressive testing, ATT is here to serve your needs. The Geosynthetics Division will work with you to assess the needs of your project and tailor the testing to your specific needs.

► CRE testing

- ASTM D1004 Graves Tear
- ASTM D4533 Trap Tear
- ASTM D4632 Grab Tensile
- ASTM D4833 Rod Puncture
- ASTM D6241 CBR Puncture
- ASTM D6392 Shear/Peel
- ASTM D6637 Geogrid Tensile
- ASTM D6693 Dog Bone
- ASTM D7737 Geogrid Junction

And more!

► GCL testing

- ASTM D6496 GCL Peel
- ASTM D6768 GCL Tensile
- ASTM D5897 GCL Flux
- ASTM D5890 Swell Index
- ASTM D5891 Fluid Loss
- ASTM D5993 GCL Mass

► Direct Shear

- ASTM D5321 Interface
- ASTM D6243 GCL Interface

► General testing

- ASTM D792 Specific Gravity
- ASTM D5199 Thickness
- ASTM D5261 Mass/Unit Area
- ASTM D5994 Thickness
- ASTM D7466 Asperity Height
- ASTM D4218 Carbon Black
- ASTM D4491 Permittivity
- ASTM D4716 Transmissivity
- ASTM D4751 AOS

And more!
